Anthony Eden Resigns as The Foreign Secretary

Refused to Step Down in His Stand Against Italy

Anthony Eden, British foreign secretary, who refused to step down in his stand against Italy, resulted in his resignation from the British Cabinet. Neville Chamberlain, British Prime Minister, whose policy of friendship and coalition with Italy over the Ethiopian invasion, was the result in his break with Mr. Eden. Lord Halifax has been named temporary British Foreign Secretary in Eden's place, following the week-end cabinet split over Anglo-Italian policies. He is likely to be named to the post.

Mr. Eden stood for application of sanctions against Italy over the Ethiopian invasion.

The resignation of Mr. Eden aroused fears in some quarters of France fearing Great Britain was turning to a policy of conciliation with Fascist states.

School Demonstration of Enterprise Work

Will Be Held Free on Friday March The 11th

On Friday, March 11th, the school is having a demonstration of enterprise work. Every grade will be taking part, each with something as original as the other. The grade ten needlework class is having an exhibition of fancy work which has been completed this year. The High School, 12 piece orchestra will be in attendance from 3 to 5 P.M. They have as their motto: "Be personable plus!" And have they got it? Admission to the school is entirely free. See posters for other particulars.

A Soft Answer Turneth Away Wrath

Premier's Text Might Give Advice to a Cabinet Minister

In the Alberta legislature last week one of the members who is in the opposition asked several questions of one of the Cabinet Ministers.

The Cabinet Minister's answers were not the kind that would be worthy of emulation by the young people of the province or in keeping with the custom of all parliaments and legislatures in the British Empire.

When an opposition member asks questions he does so to find out what the government has done and is doing and also to give information to his constituents and the public.

When a cabinet member refers to questions as "insolent provocation," "foolish" or "imprudent" it gives the public the idea that the member in power is crawling and trying to wiggle out of a hole.

As premier Albert's is a preacher of the gospel it might be a good idea if he would take a text that would give advice to his followers. For instance: Proverbs 15 - 1. "A soft answer turneth away wrath but grievous words stir up anger."

DR. LEOPOLD LEWIS

Son of Mr. and Mrs. Lewis of Medicine Hat, is coming to Redcliff at one to take over the business of Dr. Ward, who is leaving shortly for Scotland. Dr. Lewis will occupy the same building as Dr. Ward has had and we have to doubt he will be welcomed by Redcliff citizens as he is a well experienced doctor and will be able to attend to all kinds of illness of our citizens.

Dr. Leopold Lewis is a graduate of the honor course in Biological and Medical Science and in Medicine of the University of Toronto. He has served on the medical staffs of North Hudson Hospital, Newark, New Jersey, Margaret Hague Maternity Hospital, Jersey City Medical Centre, Jersey City, Rutgers General Hospital, New York State Hospital, Rome, N.Y., and Medicine Hat General Hospital.

Redcliff citizens will welcome Dr. Lewis. He will be glad to know he is such a qualified physician and will be able to look after all ailments of our town and district citizens.

As result of high north winds last Sunday night southern highways were badly blocked up again. The heavy blanket of snow was piled into deep drifts and made many roads impassable for autos and buses. On Sunday night many Redcliff citizens who were returning from Medicine Hat had to shovel out the highway and took several hours to get home.

The Council Appoints The Following Com's

Newly Elected Mayor and Councilors Were Sworn In

Last Monday evening a meeting of the Town Council was held for the purpose of swearing in the newly elected Mayor and three councilors. Those sworn in were Mayor Sampson, and councilors Evans, Hope and W. Willis.

After swearing in the following committees were appointed:

Finance—Buchholz, Hope and Evans
Waterworks—Rindahl, Evans and Shaw

Health and Sanitation—Shaw Willis and Rindahl,
Fire and Light—Evans, Willis and Buchholz

Licensing and Police—Willis, Buchholz and Hope

Building and Relief—Committee of the whole

Board of Health—The Local Physician, Rev. H. S. Hammett, Rev. H. V. Ellison, Mrs. Kitchen and H. G. Sheasby.

Building Inspector F. Broughton, continued will be the chairman.

On each committee the first mentioned will be the chairman.

Brief Arranged for The Irrigation Project

Will Be Submitted to Dominion and Provincial Govts.

At a meeting of the Medicine Hat and Redcliff Chambers of Commerce held last Friday evening, a final reading of the brief involving the Roundstone-Redcliff irrigation project was made.

The main alternatives offered are the rehabilitation of south-eastern Alberta or the spending of millions of dollars in relief with the problem still being unsolved.

The brief is to be presented to the provincial and Dominion governments and the Rowell Commission.

The Baby Clinic will be held in the school on Wednesday March 2nd from 2 to 4 o'clock.

Youth Training School Is Doing Good Work

Fine Articles Made of Pottery and Carpenter Work

Work which has been done in the local Youth Training School has been splendid and keen interest has been taken by both the instructors and youths.

At our visit to the building yesterday we were surprised to see the amount of work which has been done by the students and the splendid articles they have made.

In the pottery department some good pieces such as cream jugs, vases, jardiniere and bookends have been on exhibition and are well made.

In the carpenter department the lads had made a fine lot of chests, foot stools, medicine chests, book cases and tables, and tables, ironing boards etc., which could be put in any house.

It is not decided yet just how long the school will be continued, but it is hoped it will be kept going for some time yet.

Alberta Farmers Can Get Same Treatment

As Sack If Legislature Requests Says Hon. Mr. Gardiner

Addressing the Liberal convention in Edmonton last week Hon. Mr. Gardiner, federal Minister of Agriculture, told the farmers over the radio that they could secure the same treatment which had been accorded to Saskatchewan farmers within 24 hours of receipt of a request from the provincial "Social Credit" government.

During the legislative meeting Mr. Lush rose and asked Hon. Mr. Mullen, legislative minister of agriculture, if he had conferred with Mr. Gardiner during his visit stay in the city. It was reported that this question a bit annoyed Mr. Mullen.

Churches

ST. MARY'S CHURCH
Commencing next Sunday the service will be held at 9 a.m. The following Sunday at 10 a.m. in future service will be held at 11 a.m. on each other week these hours on each other week.

ST. AMBROSE CHURCH
Rev. H. S. Hammett, Vicar

GORDON MEMORIAL UNITED CHURCH
Rev. H. V. Ellison, Pastor

The Junior Choir in the morning and the Senior Choir in the evening will help with the service.

NOTE The basement and church all winter have been warm and if you care you will be assured of comfort.

Local Chamber of Commerce Meeting Thursday Evening

Will Be Held In The Town Hall At 8 O'clock

On Thursday evening this week a meeting of the local Chamber of Commerce will be held in the Town Hall at 8 o'clock.

As several matters of importance for the town and surrounding country will be brought up for discussion it is requested that every business of merchants, industries and interested citizens, should be present.

Don't miss the meeting as it will be most interesting.

School Literary News

The Redcliff School Literary society met in the school club room on Friday, February 18, for a most unusual and interesting meeting.

The grade nine students formed mock executive with Kenneth McKnight as president, Olive Husted as secretary and Joanne Bauman as editor. They conducted the business capably and relied on reports from various school committees. Ellen Hope was called on to explain some new forms of meeting to be held in the future. The one received most favorably was "Radio Program Meeting" in which a mock radio program would be tendered by a few of the students. Other suggestions were: handicraft, hobby, or musical meetings all to be held in the near future.

The program that followed was certainly a most enjoyable one. Joanne Bauman read "The Literary Gleaner". Following this, "The Redcliff School Orchestra" twelve pieces band of rhythm makers favored with a new selection. They introduced themselves as the "Redcliff Entertainers" with pep personality, prizes and they certainly have it! They all wore big crimson and gold hats which they used occasionally as horns, and there was a crimson and gold screen behind them. They played numerous secular selections among which three most favorably received were: "School Days", "Blue Danube Waltz", "Get Out and Get under the Moon" and "Home on the Range". Altogether it was a most interesting program, also a lot of the credit goes to the School Orchestra in their debut.

The motto for this week beautifully decorated, we're contributing by the grade nine class and the staff. They were: "Peace be an echo fill the place, save the quiet labour of silence." Andrew Young.

Where was I Right? When I was dead, what I have felt so long. My soul shall know in clearer, purer light; That where I loathed and hated, I was wrong. And where I loved and pitied, I was right. Gutterman

One of these beautiful mottos appears every week contributed by one of the classes, and one by the school staff.

All students of the high school have received or are receiving practical examinations and are thus insuring their good health.

Canadian Winter Eggs Please British Housewives

A new branch of Canadian commerce has been established in the shipping of winter-produced eggs to Great Britain. A more official inauguration January 12 when the Canadian Pacific freighter *Beaverford* sailed from Saint John with the first cargo shipment. A week before the *Beaverford* sailed, the first Canadian winter-produced eggs were sent to Great Britain (all then only "storage eggs")

had been shipped. England receiving her fresh eggs from Canadian sources. Canadian government officials stated this progressive step would boost the Canadian produce and the standard of Australian eggs and bring them into competition with poultry supplies from Denmark, drawing better prices for Canadian farmers.

Photos above show: Department of Agriculture "light-bulb" test for freshness since which each egg is individually stamped "Canada", insulating eggs from Canadian Pacific Express delivery trucks. The *Beaverford*, sailing from Saint John with the first shipment and the smiling British housewife who was distinguished as being the first user of the Canadian fresh eggs "putting the finger on" her package of "first-class" eggs. "They're delicious, much better than the foreign imported eggs. With Canadian bacon they form a wonderful meal!"

Sentiment Toward Canada

U.S. Men Willing To Cooperate
States Sir Herbert Marlowe

Sentiment in the United States is much warmer toward co-operation with both Canada and Great Britain than it was a few years ago, according to the personal view of Sir Herbert Marlowe, Canada's Minister to Washington.

Sir Herbert refused to discuss matters of politics and all subjects under negotiation in Washington at present. "I cannot speak about trade treaties, or about international affairs," he told the reporter who met him and Lady Marlowe at Bonaventure Station in Montreal. "I am told to do certain things in Washington by our Dominion Government and I do them."

"I cannot discuss President Roosevelt's Government, either."

Personality and speaking of personal opinions expressed to me, I say that there is much more feeling for co-operation with Canada and Great Britain than in years gone by. I say that there is much friendly feeling towards us. Definitely our relations are much better."

He pointed to recent evidences of co-operation in aviation conferences, in the sharing of broadcasting wavelengths.

"Canada is receiving many more visitors from the United States than it did in the past. Many are coming up here for the winter sports. That, I think, is an excellent thing and I hope that more Canadians will come down to the United States for sport. I hope that there will be more Canadian golfers in Washington soon."

Wins in One Move

Daughter Of Cheong Chee Kien
Started in 1915

A game of chess started 22 years ago by two British naval officers, has been concluded in London, with the daughter of one of the original players emerging victorious in a single move.

The girl, Elvira McNamee, employed in the Hull Telephone Exchange, had been aware of the unfinished games for some years, and finally agreed to carry on for her father, who died when the battle cruiser Queen Mary was sunk in the battle of Jutland, May 31, 1916.

The game started in November, 1915, when the girl's father, Lieutenant-Commander George McNamee, and Lieutenant-Commander James Rogers agreed to a respite by correspondence. They started two moves each every week, informing each other by letter and diagrams, which were posted when they reached port.

McNamee won the first game. The second reached the 24th move when the battle of Jutland opened and the Queen Mary sank with 17 officers and 1,200 men.

Commander Rogers kept the chessboard as a shrine and never showed it to an opponent he never saw. Recently he invited Miss McNamee to finish the game and she accepted. "I have known how the game stood for years," she said after her winning move. "I planned carefully and am glad it met with such success."

"Bliss made the very move I had feared her father would make," Rogers observed. "It left me helpless."

A Great Burden

Cost Of Crime To Canada Is Very Serious Matter

A statement issued from a Government department at Ottawa shows that the average cost of a prisoner in the penal establishments of the country is over \$2 a day, or on round figures about \$750 a year. The 25 covers food, clothing, heating, building, salaries of wardens and guards and other maintenance costs.

Many a young man and woman living an honest life and doing a good day's work has to make on less than \$15 a week. There are thousands of prisoners in the state institutions, so that the cost of crime to the country is a very serious matter indeed. On top of that there are provincial farms and reformatories, and a police force in every town and city. The public has a deep interest in keeping down crime, and every preventive method should be tried.—St. Thomas Times-Journal.

"How did the Smith wedding go off?"

"Fine, until the parson asked the bride if she'd obey her husband."

"What happened then?"

"She replied, 'Do you think I'm crazy?'" said the groom, who was in a sort of daze, replied, "I do."

A Dresden, Germany, musician recently invented a music writing type-writer.

"English is the official language in all Philippine courts."

CANADA'S EXHIBIT AT THE GLASGOW IMPERIAL EXHIBITION

Above is the artist's conception of the Canadian Pavilion at the Empire Exhibition to be held at Glasgow, Scotland, from May to October. The Canadian Pavilion, which will occupy an area of 24,000 square feet, will be situated with other Dominion buildings on what will be known as Dominion Avenue. The last large exhibition held in Glasgow in 1901 was visited by more than eleven millions, and the Empire Exhibition this year is planned on a much larger scale.

Old Custom Takes Time

Smaller House In Japan Shows Ten To All Customers

Margot Gordon of Whomocok, B.C., just returned from Japan, has been writing of her visit to department stores in the flower kingdom.

They are huge, airy places with marble staircases, up-to-date elevators, modern lighting arrangements, spacious showcases, excellent service, and a tremendous variety of merchandise. A subway connects several of the larger ones and dozens of taxi cabs whisk up to the doors and away again all day long. This is how most people arrive if not on foot, for there are comparatively few private cars, the majority being taxis which run each other round corners in a delicious fashion.

It is quite a different matter if you go into a small store where the owner serves you. While you are examining what you want, a young person will bring tea—you are being treated as a guest—and when you make a purchase, you are being thanked for your business on both sides. The only disadvantage to so much courtesy is that it takes time, especially as at least three members of the family will help in showing the wares and carrying on an unintermitted three-cornered conversation whenever you ask a question.

Another fascinating place to visit is the Old market. Here are sold second-hand kimono, hosiery and old Japanese goods, and the atmosphere is beautiful. Many gorgeous pieces of silk you find which have been worn perhaps only a few times or only once on a ceremonial occasion. The old market has many booths and as you go inside the bargaining begins.

The method of serving food in restaurants is interesting. Outside are glass cases containing clever imitations of the dishes they serve—both Japanese and foreign—which are priced and numbered. Then you go to the desk, give the number of the dishes you have chosen, pay the bill, take the numbered checks they give you and go and sit down. The food represented by the checks you hold is then brought in by waiters, who bring you a small towel wrung out in hot water with which to wipe your hands before beginning your meal.

The World's Unrest

Believe Clouds That March Our Sky To Day Will Pass

In the long run the optimist is a wise person, because the pessimist and no great and honest effort of mankind is ever without its fruit. Lord Trenchard said at the general dinner of the Canadian federal council of the Boy Scout Association in Toronto:

"The governor-general spoke of the world's unrest. 'The future may be dark,' he said, 'but it will be dark, and steadily less so. I believe that the clouds which darken our sky in these days will pass, and that when the sun shines again we shall discover we have bailed better land than we knew.'"

Here is a test of ability: If you lost your money, if you lost your health, if you lost your job, could you still earn a living?

According To Burke's Passage

British Nobility Listed In Order Of Their Country

"The next time you have a couple of Dukes out for dinner, get their names. That will show you just where to place them at table. It's the Duke of Norfolk, he's a triple O man in class 1, which makes him top after royalty."

He'd come ahead of the Duke of Northumberland, whose number is 221 in the same class. There are other dukes, the 999 in Class 265, who come quite a ways down the line.

That's how Burke's Passage classifies British nobility in the order of their creation. But if there is no Burke's handy, you can use a yardstick.

A Duchess wears a mantle with a train two yards long on the ground, a Marchioness a yard and three quarters, a Countess a yard and a quarter, and a Baroness a yard fast. Only 412 persons have held "the rank of duke. There are 21 now."

Saved Advertisers

Farmer Newspaper To Get Message Across To Grained Nations

Statistics reveal that there are 2,252,728 households in Canada. The number of newspapers is 2,248,381. By one unit far out in saying that practically every household is subscribed to a newspaper.

Over the same geographic area there are 2,058,111 radios. All of which goes to show that more than half the homes do not hear broadcast.

There are 418,900 radios in Ontario homes and 274,312 in Quebec.

"The fact that practically everyone reads the newspapers puts them at the head of the list of the various publicity media. That is why shrewd advertisers favor the newspaper to get their message across to the greatest number of people.—Kitchen Record."

Here is a test of ability: If you lost your money, if you lost your health, if you lost your job, could you still earn a living?

CUSTOMS OFFICIAL: "I thought you said you had nothing in your bag but wearing apparel—what's this?"

LADY: "Oh—this is my husband's nightgown."

—Hattie Hummer, London.

Catering On Ocean Liners

Food Required Is Accurately Gauged By Purser And Chief Steward

When the good ship Normandy started for a cruise to Rio de Janeiro she took aboard four tons of duck, five of turkey, 10 of chicken, 15 of ham, 20 of ribs and cream, seven tons of cheese, 100 tons of tea, 100,000 eggs, 4,000 cases of fruit, 100,000 cigarettes, 50,000 cigars, and numerous tons of meat, fish, vegetables and other foodstuffs. A ship's purser and chief steward have an exact quantity of food that will be required on a voyage after gauging the length of the passenger list. They reduce their requirements to a mathematical exactness, and we gather that these officers grow red in the face if they find that at the end of the voyage there is a hundredweight of ham or a sack of sugar left over. Presumably they calculate on a certain percentage of hearty eaters and a certain percentage of light eaters, and even allow for a percentage of people who are not good sailors and who make but occasional dining room visits.

This new thing, Dr. Pough said, is the result of a discovery in the past six months. It is not a cluster, but a single stone and pear-shaped. The sides are not a perfect hexagon, but show the beginnings of the six sides of a regular hexagon.

Dr. Pough was informed that the Germans can produce this rough-shaped emerald in any star or in any of the last year's stones as close as experts might be deceived with stones cut from the new green crystal.

A Keen Young Cook

Princess Elizabeth Made Cakes For Children In Wales

Princess Elizabeth is learning to cook and is trying out her pastry on the royal family.

The princess receives two lessons a week from Mr. Rene Bonville, first chef at Buckingham Palace. She began in the pastry room and soon expressed some interest in making cakes. Well before Christmas she had made her first cake, to be kept until the festive season. The cake, in fact, was done after the family went to Sandringham.

Princess Elizabeth displays an aptitude for cooking, a qualification inherited from her mother, who is "deft in the kitchen. After she finished her first cake for her "own people," Princess Elizabeth made another and larger one, which she sent to a village organization in Wales for the children.

Launch Plane In Midair

New Style Of Aircraft Is Tested In England

Great Britain's revolutionary "pocket-bomber" plane took off in the middle of the first test flight.

The test plane was launched from the back of a larger one that had helped carry it into the air. The plane was made from water gun Rochester. The planes took off as one aircraft and came down as two.

The two planes remained in telephone contact with each other until at 700 feet they simultaneously pulled levers, releasing a device that held the smaller plane on top of the larger one.

The purpose of the invention was to enable planes heavily loaded with mail and gasoline to be launched in midair for long flights without taking takeoffs from ground level.

Eastern flyers will grow in the Pacific Ocean, but they can't breed there.

New Topic Of Conversation

Scientists Have Figured Out How Old The Ocean Are

The United States Geological Survey has come up with a brand new topic of conversation to substitute for the weather when you are hard pressed for something to talk about.

All you have to do is ask "How old are the oceans?" and then go on from there.

The old lyric about "How deep is the ocean?" is the "old" way to talk into the evening fog. There were no answers to that one, but the Arthur C. Spencer and I. C. Spencer Government geologists, told the United States in Washington that previous estimates were all wrong.

They said that the oceans were five hundred to seven hundred million years old, instead of only 500,000,000 years old, as previously calculated.

Perhaps you do not care. But after all, it would make a swell topic for the bridge club, and if you follow through with this you may realize the conversation.

Geologists long have known that the sea was "as old as the hills," but how to calculate its actual age has bothered scientists for ages. Many years ago a geologist suggested that if it were known how much salt went into the ocean every year it could easily be calculated how many years were spent in accumulating the fifteen million cubic miles of salt that is dissolved in the world's oceans.

The first estimates based on this method showed an age of less than 100,000,000 years.

Other geologists, however, were unwilling to accept this figure, for they found evidence in studying the rocks and minerals of the continents which indicated a much greater age for the continents, and therefore for the oceans. Various corrections were applied to the computations until finally the figure was raised to 500,000,000 years.

Moving Pictures In Schools

Gaining Popularity As A Visual Means Of Imparting Knowledge

Available statistics show there are 340 motion picture slide projectors in Canadian schools, 10,000 in the city schools in the United States, and 10,000 in the city schools in Germany. Leading educational bodies in Great Britain, France, Italy and other countries are encouraging their use wherever possible, says an article on visual education, supplied by the United Technical Schools Visual Education is being adopted by schools as a more vivid means for the presentation of knowledge.

Artificial Emeralds

Chemical Firm In Germany Produces Very Good Imitation

An artificial emerald, made from a sort of large quartz crystal, is the first artificial emerald to be shown in this country, and was made by the I. G. Farbenindustrie, Germany's greatest chemical firm.

Its story, as told by Dr. Friedrich Pough, assistant curator of mineralogy, who brought it to New York, indicates the end of a hunt for the secret of emeralds which started in 1848.

The German company, he said, has been working on the puzzle for years. Just a year ago it partly solved it by producing little emeralds in clusters, like a bunch of grapes. The natural emeralds grow like towers, pure hexagons in shape, with axes running into hundreds of crystals.

This new stone, Dr. Pough said, is the result of a discovery in the past six months. It is not a cluster, but a single stone and pear-shaped. The sides are not a perfect hexagon, but show the beginnings of the six sides of a regular hexagon.

The Main Attraction

View At Niagara Falls Still There Although Bridge Closes

Niagara Falls, one of the great natural wonders of the world, frequently has "made" the top of the front page of the newspapers in the United States. It is the most famous of Niagara's newest sights, in which the mighty cataract and gorge have been a scene of continuous and glorious and costly contrivances, surprised the gaping millions, but there have been a few who have not.

As for the bridge itself, and without doubt it is a great thing, but it is not so much a bridge as it is a structure that has been built to last. The bridge is one of the many millions of bridges that have been built in the last few hours of the bridge and its final gap. To these millions, the bridge is one of the many millions of bridges that have been built in the last few hours of the bridge and its final gap.

As for the bridge itself, and without doubt it is a great thing, but it is not so much a bridge as it is a structure that has been built to last. The bridge is one of the many millions of bridges that have been built in the last few hours of the bridge and its final gap.

Pandering To Morose

Tendency Of Some Modern Writers To Upgrade Professions

The literary career of Mr. Booth Tarkington over a period of nearly 40 years shows that to be successful in this country a writer does not have to use a compass for an inkwell.

The title of his first popular book written in 1895 was "The Gentleman from Indiana."

And that is what Mr. Tarkington has remained from that time to this, a Hoosier gentleman, whose sparkling stories of American life and manners still contain, without offending the good taste.

The other day he spoke out, for they are against writers, and he said: "I am a subject has to be dirty to be art."

An announcement that Queen Mary would visit the district area in Wales was denied officially at the National Council. The announcement was made by Viscount Bledlow, president of the National Council for Special Service, at a luncheon yesterday.

Switch to BIG BEN for a BETTER, RICHER Chew

BIG BEN

BIG BEN

The PERFECT Chewing Tobacco

WORLD HAPPENINGS BRIEFLY TOLD

King George and Queen Elizabeth have accepted an invitation from the French government to visit France in June. It was officially announced.

Small metal stars and anchors on doors of residences throughout Japan since the war in China started indicate the family's son or father is fighting with the army or navy.

Exemption from municipal taxation of \$25,000,000 worth of Dominion-owned property was proposed by the city of Halifax in a brief to be presented to the Board of Commissioners.

Quebec will increase its provincial traffic police from 220 to 300 members by next May in an effort to reduce its accident rate by 50 per cent.

Chinese sources asserted United States volunteer pilots were taking important parts in China's attempts to rebuild her air defenses against Japanese invasion.

A British Columbia government program which would absorb all British Columbia employables for the next 10 years was announced in Vancouver by Premier T. D. Pattullo.

The Royal Naval Film Corporation with the Duke of Kent, its patron, is being formed with the object of supplying up-to-date cinema entertainment for officers and men serving in seagoing navy ships.

Carl H. Squier, sales manager for Lockheed Aircraft, Los Angeles, announced his company had signed an order amounting to \$747,000 with Trans-Canada Air Lines for six Model 14 transport planes.

Dr. Francis C. Pease, 87, pioneer Mount Wilson astronomer, died at Pasadena, Cal. Dr. Pease was the first man to measure the diameter of a star. His research resulted in the 200-inch telescope now being readied for Palomar mountain.

ALICE CLEVEN'S RECIPES

GOOD BOOKS AND PICTURES HELP CHILD'S DEVELOPMENT

A two-year-old child usually enjoys picture-books and the simplest story books about objects and events in his every-day life. He likes books about airplanes, engines, cars, boats and children.

A four-year-old child still likes picture books but he is hungry for stories, stories of his immediate experiences such as the working of the concrete mixer where the new sidewalk is being laid or the freezing of the ice-cream in the freezer.

A seven, eight or nine-year-old accepts and enjoys fairy tales and the true stories that have vigor and achievement. At this age, he usually knows that in the real world beasts do not jump out of the pen and run away.

Children's books should be beautifully written and illustrated and attractive as to paper, print and binding. They should be substantial enough to stand the wear and tear of handling.

Pictures of animals, of children, of Madonna and pictures which tell a story are enjoyed by children as permanent pictures.

Add cream syrup to candy to prevent it going grainy.

Use very few eggs and flavorings in cooking apples. Try to develop the natural flavor of the apples. One teaspoon soda and two teaspoons cream of tartar equal four teaspoons baking powder.

Readers are invited to write to Alice Cleven, Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 121 McLeod Ave. E., Winnipeg, Man.

Important Western Industry

Opening Of Plant Of General Motors In Regina Fosters New Spirit Of Optimism In West

Since the official re-opening of the Regina plant of General Motors of Canada Limited on December 16, an ever-increasing interest has been evinced in the far-reaching significance of this industrial renaissance in the West.

Business and public men who attended the opening ceremony at the Regina plant of General Motors of Canada Limited on December 16, an ever-increasing interest has been evinced in the far-reaching significance of this industrial renaissance in the West. Business and public men who attended the opening ceremony at the Regina plant of General Motors of Canada Limited on December 16, an ever-increasing interest has been evinced in the far-reaching significance of this industrial renaissance in the West.

Other speakers pointed out that the re-opening of the Western factory meant that work was assured for a regular staff of about 400 Western Canadians, while programs of associated industries are expected to provide additional employment. De signed to supply the entire western demand in Canada, the plant, present plans indicate, will provide work for the 1938 car build schedule.

The interest of the prime people themselves in the re-opening of the big factory is reflected in that fact that close to 1,000 persons witnessed the assembly line swinging into operation in the 1938 car build schedule was launched. A western production program of 10,000 units was announced by Harry J. Carmichael, Vice-President and General Manager of General Motors of Canada Limited.

At the opening ceremonies while speakers and reversed cameras flicked and broadcasted commentaries, described the proceedings, provincial and civic leaders extended a warm welcome to General Motors executives. Accompanying Mr. Carmichael from Ottawa were C. B. McFadyen, General Sales Manager, and R. H. Highfield, General Plant Manager. It was recalled that nine years ago when the plant was built the first car of the assembly line was presented by the company to the Saskatchewan branch of the Red Cross Society. Since that time, W. P. Marshall, Red Cross Commissioner, and other society officials have driven the car 50,000 miles on rounds of mercy in all parts of Saskatchewan's drought-stricken, and it is still in service.

With the re-opening of the plant, the first 1938 car off the assembly line, a Chevrolet coach, was again placed in the service of the Red Cross. Mr. Carmichael handed the keys over to Hon. A. P. McNab, Minister of the Interior, who in turn presented them to the Honourable Mr. McLeod, President of the Saskatchewan Division of the Red Cross.

In the course of his address, Mr. Carmichael pointed out that more than 150,000 Canadians depend upon the automobile industry for their livelihood. The wages he said were the highest paid to any class of industrial workers in the last war. He earnestly emphasized the problem created by the present low level on finished cars brought into the Dominion, stating that one company had discontinued Canadian operations, while a second had practically suspended activity and a third contemplated leaving the Canadian field.

It's a grand and glorious feeling when you open the dictionary to the exact page on which is the word you don't know how to spell.

Doctor: "Now, before I examine you, may I ask what you drink?" Patient: "Thank you doctor. A small whisky-and-ode for me."

Most advice is free, so you don't lose anything unless you make the mistake of following it.

A grasshopper's mouth is below its chin.

FLIN FLON

"The Story of Its Finding and Position To-day"

By FRATT KUHN

Continuing the story of Flin Flon where the electric power comes from.

The thing that interested me, however, was the conquest of the wild, the erection of 300 steel towers carrying 60,000 volts, and the line patrolling over the hills and valleys at mile 13 and mile 38. These men walk steadily, examining the conditions of wires, posts, possible dangerous fire, etc., and report by telephone from one of the eight telephone poles on the route. Occasionally they can hitch-hike a ride on a boat going down the lake and walk back at mile 13 a wood pole, single circuit, aluminum cable line 40 miles long, take off, through air-lanes switches to the Sherbrooke-Gordon line.

I asked the patrolmen, both of whom I met by good luck, if they weren't lonely, but mile 13 is close enough to Flin Flon to have visitors, and at mile 38 they are lonely only in summer, while in winter they feed themselves twice a day, hauling supplies to Island Falls over the ice. The supply business is mighty important because you can't run down to the store for anything, and you must have a year's supply on hand at all times. In winter, then, about 100 tons, valued at \$50,000 to \$100,000 of stock and provisions are hauled in and stored in warehouses for non-perishable food stuffs. There is a heated room for the storage of freezeable foods, and an ammonia refrigerating plant maintains cold storage for packing house provisions.

Believe me, I was in July that had been brought in the previous December, they stated that it was a good buy in the city, because every ship, coal, and iron ore is going to be sent in the winter, and that was what they all the housewife gets it.

The company store is extremely laid out, and carries every good thing that a housewife needs. The store carries a lot of stock, and is a good buy in the city, because every ship, coal, and iron ore is going to be sent in the winter, and that was what they all the housewife gets it.

Some part of the stock consisted of unknown lines of wool, but was for trading with the Indians, a town of Cree (Roman Catholics) being established on the mainland three miles away, whose men folk do log-piling and other work for the company. There are about 30 employed, and who are entitled to buy at the company store, the same price the white residents pay. This is a difference to the way we used to be when the Indian was fair game for the white trader. However, all through my studies I was deeply impressed with the way the company went out of their way to treat employees fairly, and with the satisfaction expressed by the men and women workers both here and in Flin Flon.

Getting up to Island Falls from Flin Flon was easy. I took a taxi to Channing, flying field, six miles out, stepped into an Arrow Airways plane with Jeff Hume-like as pilot, and in 40 minutes descended on the water at the dam and taxi-d to the wharf. Getting back I started to use the water route, so I wanted to take the boat back to Flin Flon.

From the boat, where all the passengers gather and wait, the boatmen pull a small motor launch. There are two launches, one for the company and one for the public. The company launch is a motor launch, and the public launch is a motor launch. The company launch is a motor launch, and the public launch is a motor launch.

Built By German Gun Oswald Dimmer, 63, university professor and engineer who constructed "Big Bertha" cannons of Great War fame, died recently in Baden, Austria. Big Bertha was the nickname of the German long-range gun, manufactured by the Krupp Arms Works, which in 1918 created a sensation by shelling Paris from the Forest of Compey, at a range of 76 miles.

SCENES AT RE-OPENING OF GENERAL MOTORS REGINA PLANT

These men, glowing with heat, damped from the molds. Men with long hair grab one at a time and swing twenty onto a truck in Flin Flon.

The coconut palm, second most valuable tree in the world, originated in the Malay Archipelago. It has been cultivated for at least 3,000 years. The coconut and its kernel are its chief products.

"Did you say little, miss?" the chemist asked the little girl.

"Yes, please."

"Antibiotic?"

"No, but you're in."

Every New Year gift of India is considered to be "married" to the native fruit so that she will never be left a widow.

A new German commercial airplane for 26 passengers is proposed so safe that no lifeboats for passengers are necessary.

The catch from more than 2,194,700 lobster traps in use on Canada's coast last year had a market value of almost \$4,383,900.

Chief of Amateur Fire Brigade: "You're late, getting here."

Young Fireman: "I live a long way away."

"That's no excuse. In future you must live nearer the scene of the fire."

A group of workmen; centre, of work at the Board of Trade dinner, at the Hotel Regina, from left to right: A. Thornton, president of the Regina Board of Trade; C. E. McFadyen, general sales manager; General Motors Products of Canada Limited; Premier W. J. Patterson of Saskatchewan; and His Honor A. P. McNab. The third picture shows J. H. Highfield, general plant manager, General Motors, being interviewed during the broadcast of the proceedings.

League of Canada presents TOPICS OF VITAL INTEREST

by DR. J. W. S. McCULLOUGH

ARTICLE NO. 28

The Cancer Campaign

The campaign against cancer undertaken by the Canadian Medical Association, with the aid of the Krup's fund, recalls one of the same nature now being carried on in Belgium. In this connection the secretary of the League of Canada, the Belgium society for combating cancer, Doctor Schreinemakers, well-known to many in this country, declares that the object of the campaign in Belgium was to give the best possible treatment to the greatest number of patients at the earliest possible stage of the disease.

"In order to achieve this ideal," Dr. Schreinemakers, "the following demands must be met: The public should have a basic knowledge of the nature of cancer, know what methods exist for fighting it, and above all must be persuaded of the importance of their own co-operation in this struggle. The diagnosis of cancer," he went on to say, "must be so organized that the disease is recognized as early as possible. Opportunities for suitable early treatment should be assured. For subsequent treatment there must be a service of supervision and also a 'social cancer workers' organization devoted itself to the economic and psychological aspects of cancer for the patient and his family."

Dr. Schreinemakers pointed out that the measures required for the successful scientific training of medical students in relation to cancer; a constant re-awakening of interest among practicing physicians by means of courses on the subject; by post-graduate lectures; close co-operation between physicians and anti-cancer centres; in a word, by tackling the practical side of the question.

Belgium is well organized to cope with the cancer plague. The centres for diagnosis and treatment of cancer are among the best in the world. The organization for preventive work is not surpassed anywhere. In every phase of effort against cancer, Canada can learn something from the heroic little Kingdom on the North Sea.

Next article: Cancer of the Rectum.

Editorial Note: Readers desiring complete sets of Dr. McCullough's cancer articles at no charge, may write to The Health League of Canada, 165 Bond St., Toronto, Ont.

A Romantic Sea Career

Ship on India Run Has Plowed Waves For 35 Years

The beginning and end of a romantic sea career was marked by the departure recently from Bombay of the oldest ship of the P. and O. fleet, the R.M.S. Kalaiah, which has made no fewer than 304 runs from England to Bombay and "needs no steering she can find her own way to and from Bombay," said her officers.

After one more voyage to China the ship will pass into the hands of ship-breakers. She has the proud distinction of having plowed the waves for 35 years. Since her launch, 1,868,811 miles, which is 4,319 miles short of 70 times round the world by air.

Built for the Far Eastern service she was launched at Greenock Dock 44 days before the Great War broke out. She was commissioned to transport troops and after the Armistice was chartered to convey Australian troops home. Since then she has been on the India run. She has carried 50,000 passengers to and from Bombay.—Rupprecht News Union.

Interest Pays For Cake

Ceremony Organized By Actor Has Reached 144th Year

On a recent Thursday—Twelfth Night—the Haskley Cake was cut at Drury Lane Theatre in London for the 144th year in succession. The ceremony was witnessed only by the management and the company appearing in the current play, Robert Anderson, a party cook, who became an actor's friend in 1794, the latest to be used for the making of a cake to be eaten by the company at Drury Lane every Twelfth Night.

Home-made ICE CREAM 3 pints for less than 20¢

Ingredients: one package Jell-O Ice Cream Powder, one quart half milk, half cream, one egg, and one tablespoon salt outside in cold water, stir two or three minutes. The whole job will take two minutes of your time. And the ice cream? You'll be proud as you "made it myself." Grocers sell Jell-O Ice Cream Powder.

ICE CREAM POWDER

WHAT HO!

CHAPTER V—Continued

"Please show Mr. Punder out."

Punder stood there, looking more

lull-like than ever.

"Do you want to be shown out, or

thrown out?" said Ernest. "I give

you ten seconds to decide which."

"I'll go," said Punder. "But, mark

my words, I'll be back. Hah!"

He slammed his stick hat on his head

and strode out of the room, slinging

When he had gone the earl said,

"I didn't take to him very much,

did you?"

has gone. And I'd say he did. Nice

looking fellow, my boy."

"But, father," said Rosa, "you

don't know Punder."

"What?"

"You don't realize what a spiteful,

ruthless, unscrupulous man he is,"

she said. "I've heard stories about

him. Getting his own way is an

obsession with him. Now we've got

his back up, and Punder never forgets

When he says he'll be back, he

means he'll be back; and in spite of

what our family crest reads, are we

really prepared to fight a powerful

brute like Punder?"

"Oh, he was bluffing," said the

earl.

"No, he wasn't," said Rosa. "He'll

be back."

"Let him come," said the earl. "I

forget to ask him how the deuce they

packed stuffed olives in bottles so that

all their little red noses press against

the glass."

"We've made a cruel error," Rosa

said.

"And I'm afraid I'm to blame,"

said Ernest, who, having discharged

his share of temper, felt a bit empty

and apprehensive.

"Nonsense," said the earl. "You

made a sporting gesture. I was

afraid for a moment you were going

through with it."

"So was I," said Rosa.

"But will he do anything, do you

think, sir?" asked Ernest.

"He may. But as with pickades, or

something like that," said the earl,

unperturbed. "But we should worry

what? Are we blingies or are we

bohollins?"

CHAPTER VI

If, for the thing seemed more than

possible, Ernest Blingly had any

idea of his own position in the

world, he would have been

"And women?" asked Mrs. Feather-

by, with a coy smile.

"And women," replied Crump, re-

turning it with a shrug.

"Is he an old dog do you think?"

"I don't say he is a criminal," said

Mr. Crump, "but I don't say he is a

millionaire either. He has a lot of

ways, and he is not posted on the

umbrage of society."

"Things are different in the States,

my sister writes me," said

the cook. "Shouldn't wonder if at

home he lives in a wigwag."

"I wish—" began Crump, and

paused, the wish unuttered.

"What do you wish," asked the

cook.

"Rather not."

"Is it anything to do with me?"

she asked, archly.

"No," he said. "I mean we'll take

that up later. Just now we are dis-

cussing that foreign party. My wish

is that he is all he represents him-

self to be. It could save a lot of the

family's problems, Mrs. Featherby."

"Could it not," said the cook. "I'd

rather not answer anybody, even an

American, that would speak to me

old Frothylike the Knuckle-

cracker."

"My dear Mrs. Featherby," said

Crump, "you have been in service

here too short a time to speak in so

supercilious a fashion of a member of

one of our oldest county families."

"Is that what all the servants

say?" asked Mrs. Featherby.

"It is just between you and me, Cecil."

She accompanied her first use of

his first name with so courteous a

look that Crump, hitherto backed up

by the fact that he was a bit of a

snob, followed up her advantage.

"You don't like him yourself, Cecil."

"Oh, yes."

Crump set down his tea-cup.

"My little sister, the daughter of Captain

Duff-Cooper is, to him, I dare say,

a matter of complete indifference."

Crump said. "As a gentleman and a

gent in this house he is entitled to

receive and do receive from me my

best and most respectful service."

He added, suddenly dropping

his drawing-room tone, "between

you and me, that's all right, up to

me, I don't like the big fellow."

"Another cup of tea, Cecil?"

"Thank you so much, my sister."

"I don't like him either, but he

must have another little chat in the

fact of total future."

"What?"

"Till then, my sister," said Crump,

with a languishing look, he left

her.

"Crump's tour of inspection to see

if the duchess had been one of the

first he did not notice Ernest, sunk

in a sofa and surrounded by a

multitude of his history of the past

played by sundry stately Blingies

in the Wars of the Roses, one of the

few towns near the capital of the

land with which he was not familiar.

Ernest saw Crump first, saw a look

of indignation on a young man's face,

usually, no expression as a trait.

"Beg pardon, sir," said Crump. "I

was not aware you were here."

He was near his hat with a

thought you were in the potting-shed

with his lordship."

"I was here," said Ernest, coming

from the middle age. "But I'm

not there now. I'm here."

He was near his hat with a

thought you were in the potting-shed

with his lordship."

WHEN COLDS BRING

SORE THROAT

Relieves THROAT PAIN RAWNESS

Enters Body Through Stomach and Intestines to Ease Pain

The speed with which "Aspirin" acts in relieving the distressing symptoms of colds and accompanying sore throat is utterly amazing, and the treatment is simple and pleasant. It is all you do, crush and dissolve three "Aspirin" tablets in a small glass of water. Then gargle with this mixture and your throat will be well.

This medicinal guggle will almost at once relieve the sore throat, irritated membrane of your throat. Pain soon promptly, even if relieved.

"Aspirin" tablets are now in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited, of Windsor, Ontario. Look for the cross on every tablet.

"ASPIRIN"

Statement Is Wrong

Churches Are Not Empty As Many People Assume

A familiar fallacy in this day is that the churches are empty. Such comment could hardly have been written by anyone who has attended a church service, or even arisen early enough on a Sunday morning to pass by a church and observe the crowds, the stately Pious Women, the people really are going to church to all kinds of churches. Even places with uncomfortable seats or dark pews receive their quota.

Attendance at a church service does not necessarily mean that a church is flourishing in the way should flourish. It does not necessarily mean that the members of the congregation are experiencing a spiritual day, that they love their fellow man and that they have committed themselves exclusively to good deeds. But attendance at a church service does indicate that they are

and if they say that the churches are empty.

When they are wrong on that point, they may also be wrong in their criticism that this is a shallow age, bereft of spiritual emotion. The continual refusal to which faith in these days is subjected does not necessarily mean that there is no faith left. Cradly and downright, however, can with unshaken courage stand the world, but that is no clear proof that nothing remains of virtue. It may only prove that man's intellectual deliberations cannot be so easily depended upon to produce solutions to problems.

People who have found that they can put no trust in the Nine Power Treaty and who have found that government management of business does not avoid stock market crashes are apt to delve deeper for their assurance.

Debt is a thing a person runs into but can't get out of faster than a snail.

Apart from the taxes, it costs money to step on the gas.

Discover Of New Worlds

Professor Pickering Was Outstanding Astronomer Of Modern Times

The world has lost one of the greatest explorers of modern times. Prof. William H. Pickering, few

laymen may have heard of Pickering, but as the outstanding astronomer of his time he discovered, not

new continents, but new worlds. More than any individual, the man

who for 30 years lived at the Harvard Observatory at Manchester,

Massachusetts, gave an impetus to the science of the stars.

Back in 1890 Pickering discovered the planetoid, Proclus. In 1908 he wrote a book, "A Search for a Planet Beyond Neptune." It was largely

speculating, but he was convinced that the solar system's machinery was not running according to schedule and that only another planet, entering its force on the known world, could be responsible. In 1919, after further study, he became mathematically certain of its existence. He plotted its course and probable location. At the same time the late Dr. Percival Lowell was writing on similar lines. Then in 1929 Pluto was found. It was but a degree and a half from where Pickering had placed it and five to six degrees from where Lowell had figured his position.

Pickering was one of the first astronomers to organize distant expeditions to observe solar and lunar eclipses. His passion for mountain climbing was another indication of the explorer in him. His work for science was solid and lasting.

LODGE Scholarships

Names Of Winners In Various Provinces Are Announced

Mrs. J. D. Delver, national educational secretary of the Imperial Order of the Daughters of the Empire, has announced names of successful candidates for the LODGE War Memorial Scholarships (overseas) for 1938-39. Seven scholars, each valued at \$1,000, were awarded, permitting recipients to study for one year at any university in Great Britain.

The awards:

British Columbia, George Kane, graduate of University of British Columbia; Alberta, Faylie Mary Brewster, graduate of University of Alberta; Saskatchewan, David Munro, respondent; Manitoba, Fred M. C. Goodspeed, respondent; Ontario, Thomas Allen, graduate of Queen's University; Quebec, David Macgregor, respondent; Nova Scotia, George A. Ferguson, respondent; New Brunswick, Gordon M. Black, respondent.

About 150 times as many are manufactured in the United States; they vary from the size of a pinhead to more than two inches in diameter.

The most dangerous age for children is from five to ten, according to statistics of fatal accidents in England.

England, as a nation, spends about \$60,000 annually on laundry work.

Ches Prodigy

Percival Van-Olden, World's Worst Championship For All Girls Under 21

Whiskers and lines of wisdom always went with the popular conception of toptight chess players until dimpled Elaine Saunders, age 12, came along.

She met Dr. Alexander Alekhine, the world champion, in a tournament in England, and, while he defeated her, he said afterwards she was a genius and caused him a lot of trouble.

For the last two years she has been champion of the open chess tournament for girls of 12 and under. She started playing chess seriously when she was six years old, and her mother says she took to the game as easily as most children master tidily-winks.

She likes the company of grown-ups rather than children, and thinks a lot of games one has to play at parties are silly. Her ambitions are to become an air pilot and own a riding school. She doesn't like party frocks because a person usually catches cold and has to have medicine and doctors.

The Village Blacksmith

Five Thousand Shops Are Still Operating In The Dominion

In view of the advance of the automobile and the farm tractor, it may seem surprising to learn that there are even now some 5,000 blacksmith shops still operating in the Dominion, but such is the case, and the village boy still has an advantage over his land-crawled city cousin. In the cities of over 50,000 population there are only 500 of these shops, while there are more than 4,000 in the rural areas, and over 1,000 in the villages and small places—Kitchener, for example.

Not Thing Of Past

With Britain and the United States both engaged in rearmament programs, one of the features of naval construction is the return of the battleship. For a time it was argued that the advent of the airplane and the development of the submarine had made battleships too vulnerable and that they were a thing of the past. But the battleship is back—at a cost of \$60,000,000 apiece.

Alberta Retail Merchants' As-
sociation is meeting in convention
in Edmonton this week.

Rev W. B. Smith, who was the
pastor in Gordon Memorial some
time ago is undergoing an opera-
tion in Edmonton Royal Hospital

Several S.C. members of the
legislature drove out to Fort
Saskatchewan prison last week
end to pay a friendly visit to
teens Unwin and Powell.

On two occasions in the Alberta
legislature this week eleven S.C.
listed members voted with the
liberal Conservative and Inde-
pendent members.

At the Manufacturers' Associa-
tion held in Medicine Hat last
week, J.E. Davies was elected
Chairman and N. Meldrum of
Redcliff, Vice Chairman. H. J.
Nelson is a member of the execu-
tive committee.

Medicine Hat city council has
voted \$500 to the Chamber of
Commerce which has prepared a
brief on irrigation in connection
with the Ronalans-Redcliff sch-
eme. This grant is to be used for
the expense of bringing this mat-
ter before the governments.

The marriage took place quietly
at Redcliff, Sunday February 20,
of Beatrice, only daughter of Mr.
and Mrs. K. Raber of Melville
ask. to Dr. Lee Lewis, Son of
's and Mrs. H. Lewis of Medicine
hat, Alberta.

Dr. and Mrs. Lewis are coming
to Redcliff to reside, and the Dr.
is taking over Dr. Ward's business

Boys of the local Youth Train-
ing School held another of their
spuler dances in the I.O.O.F.
hall last Friday evening. The
hall was well filled for the occa-
sion and the music was provided
by Thomas E. T. Cooke and K.
Ellis. Holder of the lucky ticket
for the card table, made by the
boys, was Geo. Ordry. It is
understood the boys will hold
another dance this week.

Last week-end Miss Kaja
Maden left for Strathmore
where she secured employment
as a clerk in one of the stores in
that town.

Two S.C. Members in the legis-
lature have made a resolution
to reduce salaries of members and
Cabinet Ministers. The total
deduction would amount to a
saving of \$26,475 a year.

Misses Jessie Stratton and
Violet Bell left last Friday for
Calgary to take courses of hair
dressing and dressmaking in
connection with the provincial
Youth Training School in that
city.

Last Friday evening the "Cav-
ernade of Fashion Show" recently
put on by St. Ambrose S.W.A.
was presented in Holy Trinity
parish hall. Medicine Hat, before
a fairly large crowd. The show
was well received.

Friends of Mrs. R. Phillips will
be pleased to know she has return-
ed home from the hospital and is
progressing favorably. Monday
afternoon a number of her lady
friends called to see her. The
occasion was the wedding anni-
versary of Mr. and Mrs. Phillips

Edmonton—Extension of the
provincial government morator-
ium on private debts for at least
30 days, pending the introduction
of new debt reduction or adjust-
ment legislation, will be announc-
ed by the government shortly, it
was learned in official circles this
morning.

The production of seed of biennial
and perennial forage crops
has not been of very great impor-
tance in Southwestern Saskatchewan
and Southwestern Alberta.
However, it is very often possible
to grow sufficient seed on a com-
paratively small plot to seed
down larger areas on the farm or
ranch unit. The distribution of
sample lots of seed under the P.F.
R.A. is an encouragement in this
direction and, together with the
development of water conserva-
tion, will probably result in more
seed being harvested in the future.

DRIED OR
PICKLED
FISH

Want to surprise the family with a new dinner-
time treat? Serve them a tasty dish of Dried or
Pickled Canadian Fish.

No matter where you live, your dealer can get you
such Dried Fish as Cod, Haddock, Hake, Cusk and
Pollock, and such Pickled Fish as Herring, Mackerel
and Alewives... in perfect condition. Interesting
recipes can be used for every one of these fine fish.
Fish is a wonderful health food, good for every mem-
ber of your family. It is the great source of proteins
that help build sturdy, healthy bodies.

Serve Dried or Pickled Canadian Fish to your family
often... they will enjoy it... and you will find it
economical, too.

WARNING

TAKE NOTICE THAT THE CITY OF
CALGARY does not
concern itself in the business of
selling or distributing liquor to
be taken to the city limits from
outside points. The chances of employment
here are very poor. In the event of the city
being compelled to give assistance, it will
be to the benefit of the city and not the
benefit of the liquor traffic.
